

Exciting New Opportunity for CIPL Member Congregations with Child Care Centers!

CIPL is pleased to announce a new partnership with the California Preschool Energy Efficiency Program.

California Preschool Energy Efficiency Program (CPEEP)

The California Preschool Energy Efficiency Program (CPEEP) helps center-based childcare and preschool facilities in the Southern California Edison and Pacific Gas & Electric service areas be healthier, greener and save money on energy bills, all for free. CPEEP is a program of the Low Income Investment Fund.

Who Qualifies?

Eligible licensed center-based child care facilities include all Head Start, state-contracted and private centers served by Southern California Edison and Pacific Gas & Electric. **All houses of worship that work with a child care facility on site are eligible!**

What does CPEEP Provide?

After a comprehensive energy assessment, the program will replace older, energy-intensive equipment with more efficient alternatives. **CPEEP is fully funded to provide these energy efficiency assessments and installations 100% free of charge!** A few examples include:

- Fluorescent lighting conversions (T12 to T8 or T5)
- Incandescent to CFL conversions
- Exit sign conversions (incandescent to LED)
- Occupancy sensors to turn off unused lighting
- Air Conditioning Unit Tune Ups

About LIIF

The Low Income Investment Fund (LIIF) is a national nonprofit community development financial institution (CDFI) with a quarter century of experience providing capital and technical assistance for affordable housing, child care and education facilities. LIIF provides a bridge between private capital markets and low income neighborhoods.

For more info, please be in touch directly with CPEEP/LIIF:
Katie Mayerson, Program Officer – Low Income Investment Fund
